Bliss Tables

APQS longarm tables are meticulously designed and built with lots of time-saving features to help you easily manage your quilt. For example, the quilt top, backing and batting all load from the top, eliminating the need for bending to attach your quilt. Plus, our table rails and rollers don't have junction points, which streamline the design and make it possible for our wheels to move smoothly, preventing any sway.

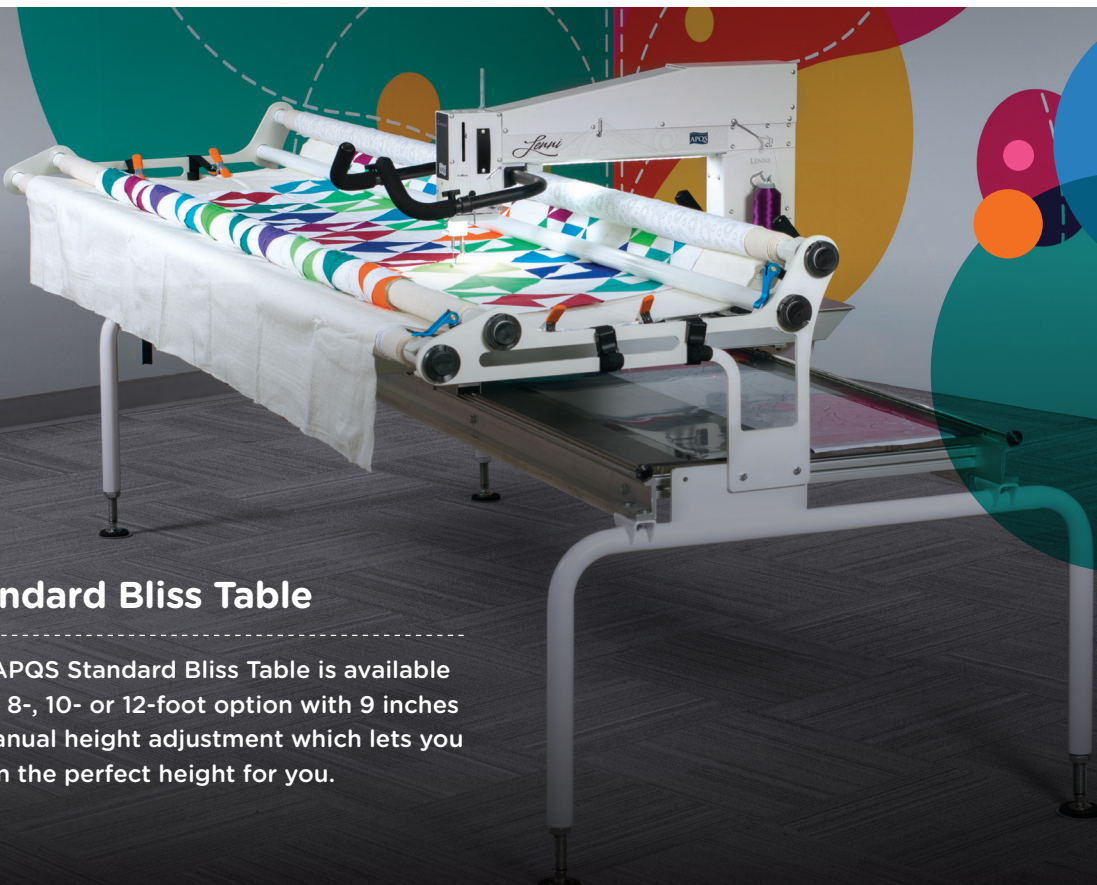

Bliss - it's the only word we could find that could possibly describe that effortless feeling you'll get when you quilt with our exclusive track system. Specially designed horizontal wheels on the sewing head and roller bearings on the table rails provide smooth, effortless and easy movement allowing you to quilt for hours without feeling tired.

Adjustment-Free Quilt Take-up Roller

Most machine tables require the quilter to raise the take-up roller as the quilt sandwich is advanced to keep it from rubbing on the machine's throat. The APQS Adjustment-Free Quilt Take-up Roller is already centered in the throat of our machines. You'll never have to waste time raising or adjusting it, even at the end of a king- or queen-size quilt. Our unique compression roller brakes let you adjust the quilt layers independently to manage all quilt types - from delicate antique quilts to heavy denim throws. Simply lift the brake handle to easily advance the quilt.

Standard Bliss Table

The APQS Standard Bliss Table is available as an 8-, 10- or 12-foot option with 9 inches of manual height adjustment which lets you dial in the perfect height for you.

Deluxe Bliss Table

The 8-, 10-, 12- or 14-foot Deluxe Bliss Table comes with 9 inches of manual height adjustment which lets you dial in the perfect height for you.
